

ASHENVALE

-MAP Kit-

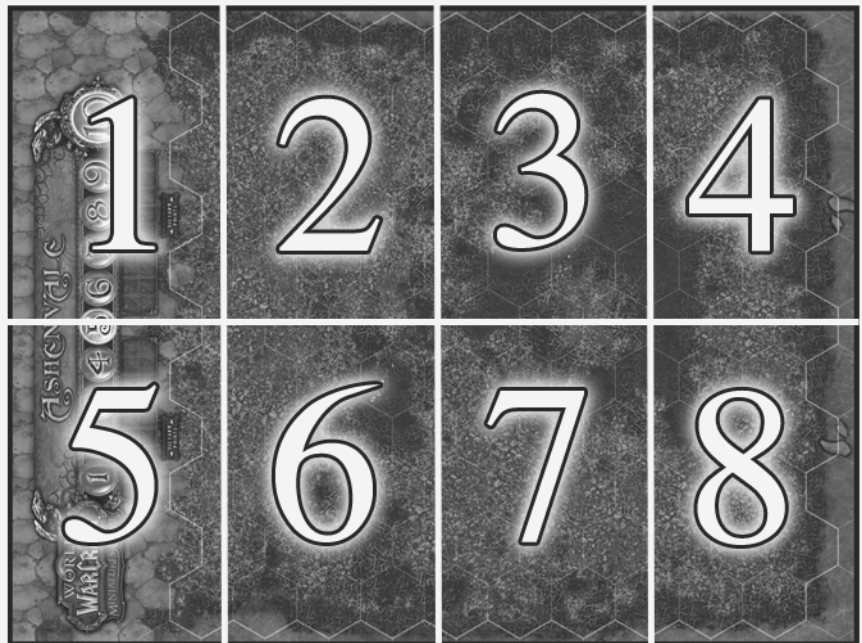

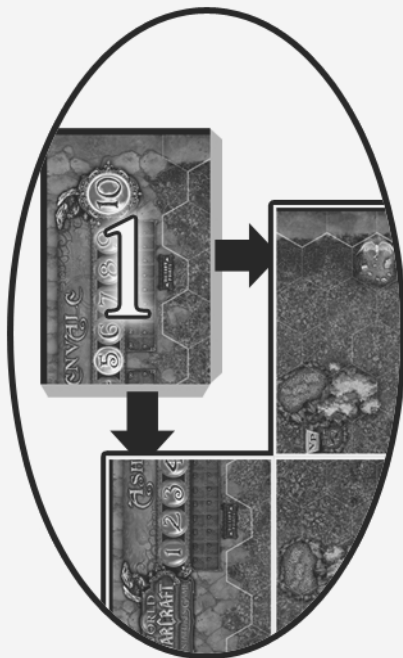

INSTRUCTIONS

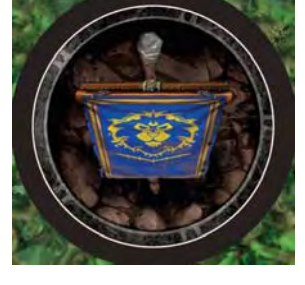

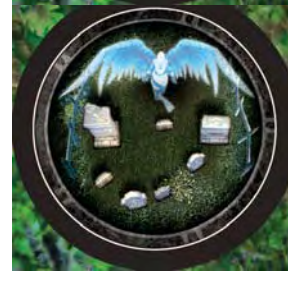

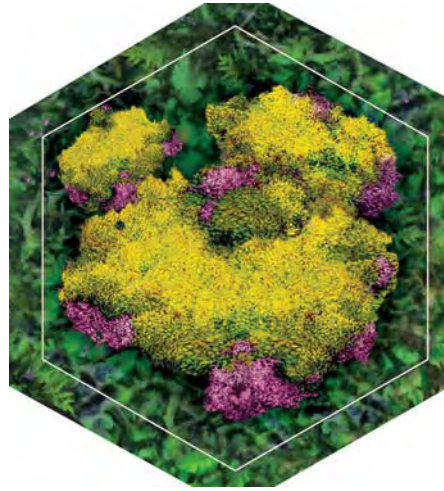

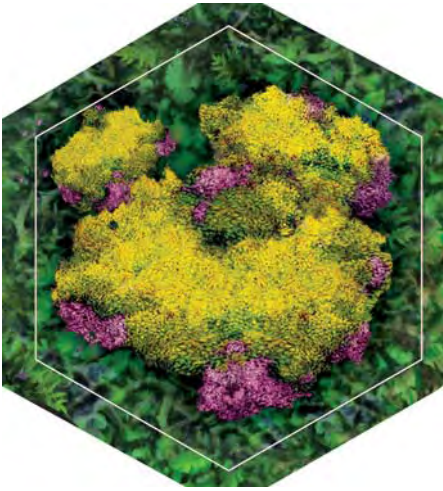

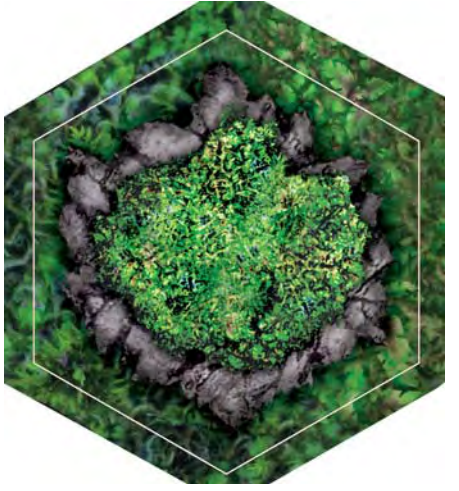

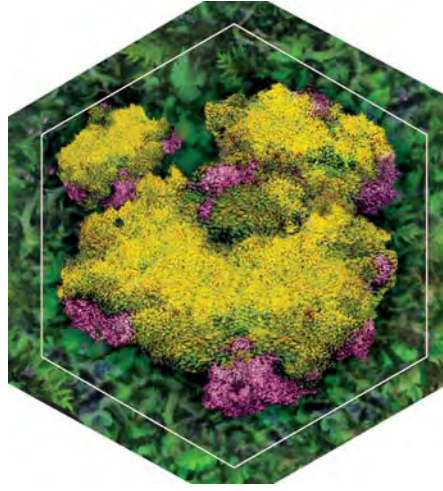

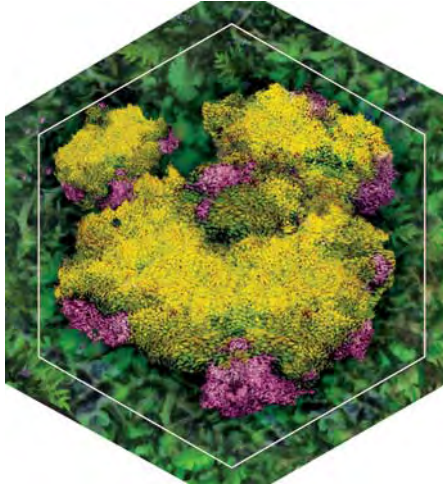

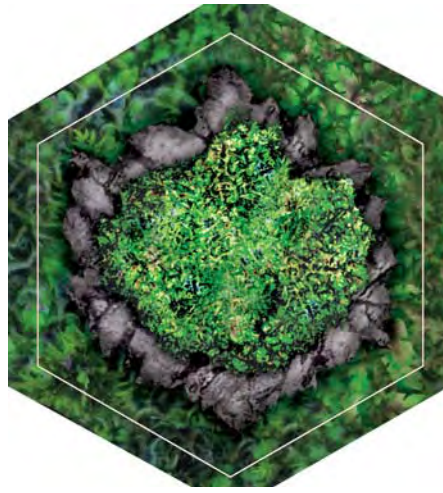

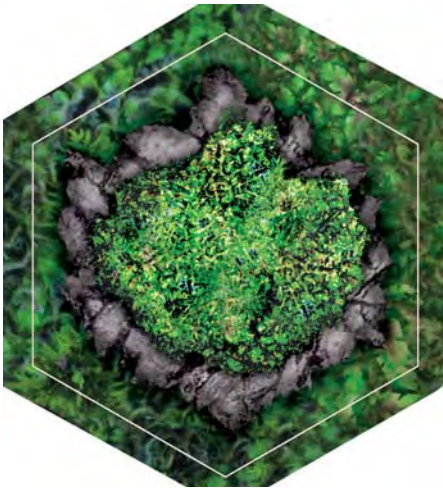

MAP

The map is divided up into eight tiles, which need to be assembled with tape or glue before you play. Print out the pages and then cut out each tile, being careful not to cut off the tabs that help with map construction.

When attaching the map tiles, start from the upper-left corner. See the diagram for more information on tile order for map construction.

Note: When printing out the map, minis and cards, make sure that your printer settings are set to "No Scaling" to prevent the components from being resized.
